

De Paul Treatment Centers

NEW! Medication-Assisted Treatment

What is Medication-Assisted Treatment (MAT)?

MAT is the use of medications in combination with counseling and behavioral therapies for the treatment of Opioid Use Disorder (OUD). A combination of medication and behavioral therapies is found to be an effective treatment of OUD and can help people to sustain recovery long term.

How to get MAT services at De Paul:

- Admit to De Paul's Detox program or be in De Paul's residential program.
- Be medically and psychiatrically stable.
- If currently on a prescribed medication, bring prescription supply with you when being admitted to De Paul's program.
- Have Health Share of Oregon or Open Card Insurance.
- Eligibility for MAT services will be determined after a complete client evaluation. Not all individuals are eligible for MAT. Final determination is made by De Paul medical staff.

Getting Started

Detox Program (No appointment Necessary)

Individuals seeking detox services must arrive at De Paul Treatment Centers' downtown Portland location at 1312 SW Washington St., by 8:00 a.m., Monday through Sunday. Clients are admitted on a first come, first serve basis. Admission is dependent on bed availability. To check bed availability in advance, call the Detox Availability Hotline at: (503) 546-8311. The hotline is updated throughout the day, every day, as beds become available. Individuals from out of the tri-county area must call 503-535-1150 to be pre-screened and schedule a detox intake appointment in order to be able to directly transition to De Paul's residential program.

Residential Program

For any individual seeking residential treatment, please call (503) 535-1150.
